

GYÖRGY AGÓTS

Graphic designer

As a self-educated graphic designer, it motivates me to develop my skills and learn new things from day to day. Short-term goal is to gain as much work experience as I can. I find myself hard-working and reliable, cause I acquire my knowledge from my own so far. Besides that, I have a good problem-solving ability and creative imagination.

KNOWLEDGE

EDUCATION

Óbudai University | Technical Manager

2015 sept - 2016 jan (1 passed semester)

I started this course because of a hasty decision and after a successful semester, I had to come to the conclusion that although I could finish the course but would not enjoy it or learn what I would like to deal with.

Budapest Business School | Economic Informatics

2016 sept - 2018 jan (3 passed semester)

I was starting the new university with renewed strength and finally thought I had found what I was looking for, cause IT always interests me. But unfortunately I disappointed again because I didn't learn what I expected.

After university

So I finally made the decision and left school. First, I start coding, which was a great help to build my website. Then I continued with the Adobe programs (Ai, Ps, Id), after that I got into the UI and webdesign field. So here I am without a degree, without any kind of desire to have one and keep learning/working to become a professional graphic designer.
